

OILIND SAFETY SERVICES

Preserving Life One Person at a Time

Experience. Diversification. Fully Integrated Programs.

Unique in its range and competence, Oilind Safety combines the latest advances in safety technology and equipment with more than 40 years of hands-on industry experience. Our diverse safety disciplines, training and effective implementation of safety programs are an integral part of our clients' operating efficiency.

Our goal is to assist you with the safe completion of your projects on a timely basis. Oilind Safety services begin with a comprehensive overview of your project operations requiring safety initiatives. Safety professionals are committed to helping owners, contractors and service companies improve and carry out safety policies and objectives.

Fully Integrated Safety Services reduce costs, save time.

The depth of Oilind Safety's experienced personnel and the wide variety of safety equipment we provide help us meet virtually any safety need our customers require. Oilind Safety's single-source capabilities, including equipment maintenance and repair, help you reduce costs and save valuable time in the process. We provide a wide range of safety services including:

Oilind Safety also provides a complete **Mobile Service Center** for on-site full-service breathing apparatus maintenance and cylinder hydro testing. There's no need to waste valuable time servicing equipment off-site.

- Thorough on-site cylinder testing facility.
- Avoid taking 5- and 30-minute air packs to large testing facilities and not getting them back quickly or at all.
- Cylinders stay on-site, drastically reducing out-of-service time and completely eliminating cylinder transportation concerns.
- Respiratory integrity reduces need for extra or back-up cylinders.

- Safety supervision
- Safety training/confined space training
- Incident reporting and investigation
- Safety/loss prevention and loss control management
- Safety audits and inspections
- Safety plan development and implementation
- Instrumentation repair and calibration
- Equipment maintenance and repair

Professional H₂S Services helps save lives.

Deadly H₂S gas, also known as Sour Gas or hydrogen sulfide, is found in many hydrocarbon reservoirs and petrochemical processing environments. It can cause injury or death in concentrations as small as 100ppm. Every worker that could become exposed to H₂S needs to know how to recognize its presence, how to protect against its effects and how to rescue and administer first aid should someone be overcome by it.

Oilind Safety's valuable experience providing H₂S safety solutions includes:

- Preplanning and site specific contingency plans
- Pulmonary Function Testing (PFTs)
- Respirator renting/fit-testing including:
 - Gas monitors
 - Grade "D" and "L" breathing air
 - Compliance inspection services

Safety...and much more.

With an expansive national footprint and an extensive product line, industrial construction specialist expertise, Red-D-Arc® welding rental equipment, complete industrial gas resources and safety training programs, Oilind Safety and Airgas provide the complete solution for all your on-site safety, MRO and gas supply needs.

Engineering the Right Solutions for All Your Safety Needs
